EMI 2024 International Conference

September 11-13, 2024 | Vienna, Austria

We are happy to announce that Vienna has been selected as the venue for the EMI 2024 International Conference on the premises of the TU Wien (Vienna University of Technology), within walking distance to many of the city's world-famous landmarks.

The EMI 2024 IC will continue a remarkable series of conferences which have repeatedly gathered the key players in the ever-changing and interdisciplinary field of engineering mechanics. It does not only promise to become an inspiring and stimulating scientific event, but will also allow for an unforgettable cultural experience in the beautiful city of Vienna.

We are very pleased that numerous distinguished colleagues have already volunteered to organize [mini-symposia](#) on selected topics.

Prospective authors are kindly invited to submit an abstract related to the mini-symposia or free topics – plain text, max. 300 words – through the [online abstract submission system](#) by March 30, 2024.

We are genuinely looking forward to welcoming you in Vienna, to learn and share exciting new scientific insights and results, to network, and to socialize.

For updates please visit **www.emi2024ic.com** or contact us at **emi2024ic@tuwien.ac.at**.
